Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

NAMES AND LABELS Buttons do not have an accessible name These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader. ARIA ARIA input fields do not have accessible names These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader. CONTRAST Background and foreground colors do not have a sufficient contrast ratio. These are opportunities to improve the legibility of your content. **NAVIGATION** The page contains a heading, skip link, or landmark region These are opportunities to improve keyboard navigation in your application. ADDITIONAL ITEMS TO MANUALLY CHECK (10) Show These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.
